Lin Donn,Don Donn

Atlas of Medieval Europe David Ditchburn,Angus Mackay,2002-09-11 Covering the period from the fall of the Roman Empire through to the beginnings of the Renaissance, this is an indispensable volume which brings the complex and colourful history of the Middle Ages to life. Key features: * geographical coverage extends to the broadest definition of Europe from the Atlantic coast to the Russian steppes * each map approaches a separate issue or series of events in Medieval history, whilst a commentary locates it in its broader context * as a body, the maps provide a vivid representation of the development of nations, peoples and social structures. With over 140 maps, expert commentaries and an extensive bibliography, this is the essential reference for those who are striving to understand the fundamental issues of this period.

The Hereford Mappa Mundi Gabriel Alington,1996

Medieval Maps P. D. A. Harvey,1991 Professor Harvey traces the development of western mapmaking from the early Middle Ages to the first printed maps of the late 15th century, discussing their traditions, artistic and technical aspects, and uses.

Eastern Europe in the Middle Ages (500-1300) (2 vols) Florin Curta,2019-07-08 Winner of the 2020 Verbruggen prize This book provides a comprehensive synthesis of scholarship on Eastern Europe in the Middle Ages. The goal is to offer an overview of the current state of research and a basic route map for navigating an abundant historiography available in more than 10 different languages. The literature published in English on the medieval history of Eastern Europe—books, chapters, and articles—represents a little more than 11 percent of the historiography. The companion is therefore meant to provide an orientation into the existing literature that may not be available because of linguistic barriers and, in addition, an introductory bibliography in English. Winner of the 2020 Verbruggen prize, awarded annually by the De Re Militari society for the best book on medieval military history. The awarding committee commented that the book ‘has an enormous range, and yet is exceptionally scholarly with a fine grasp of detail. Its title points to a general history of eastern Europe, but it is dominated by military episodes which make it of the highest value to anybody writing about war and warmaking in this very neglected area of Europe.’ See inside the book.

Framing the Early Middle Ages Chris Wickham, 2006-11-30 The Roman empire tends to be seen as a whole whereas the early middle ages tends to be seen as a collection of regional histories, roughly corresponding to the land-areas of modern nation states. As a result, early medieval history is much more fragmented, and there have been few convincing syntheses of socio-economic change in the post-Roman world since the 1930s. In recent decades, the rise of early medieval archaeology has also transformed our source-base, but this has not been adequately integrated into analyses of documentary history in almost any country. In *Framing the Early Middle Ages* Chris Wickham combines documentary and archaeological evidence to create a comparative history of the period 400-800. His analysis embraces each of the regions of the late Roman and immediately post-Roman world, from Denmark to Egypt. The book concentrates on classic socio-economic themes, state finance, the wealth and identity of the aristocracy, estate management, peasant society, rural settlement, cities, and exchange. These give only a partial picture of the period, but they frame and explain other developments. Earlier syntheses have taken the development of a single region as 'typical', with divergent developments presented as exceptions. This book takes all different developments as typical, and aims to construct a synthesis based on a better understanding of difference and the reasons for it.

Atlas of the Medieval World Rosamond McKitterick, 2004 Forged in an age of faith and war and tempered by great statesmen, religious leaders and artists, medieval civilizations witnessed remarkable transformations. Far from being a homogeneous world of knights and castles, the era saw a multitude of contrasting and often competing cultures, many of which became the foundation stones for the emergence of modern societies. From the expansion of Islam across the Mediterranean to the appearance of centralized states and Christian monarchies, the *Atlas of the Medieval World* draws from new archival and archaeological evidence to reveal a period of astonishing cultural vibrancy and political diversity. Alongside stunning maps covering nearly a millennium of one of the most formative phases in history, hundreds of exquisite pictures of art and architecture accompany expertly written text edited by Rosamond McKitterick, Professor of Early Medieval History at Cambridge University to bring an extraordinary period to life as no reference has before. The Arab invasions of Europe, the empire of Charlemagne, the African kingdoms of Songhai and Mali, the Crusades, the Viking and Mongol invasions, the Delhi sultanate and the T'ang and Ming empires are just a few of the subjects explained in the *Atlas of the Medieval World*. What's more, cultural and economic trends such as the spread of literacy and the growth of towns receive equal attention alongside the emergence of kingdoms and the march of armies to form a comprehensive history of all major societies outside of the

Americas during the Middle Ages.

Ridpath's History of the World John Clark Ridpath, 1897

Medieval Maps of the Holy Land P. D. A. Harvey, 2012 Looks in detail at eight regional maps of Palestine that were drawn between the late 12th century and the mid-14th ; with their various versions and derivatives we know them through 23 surviving artifacts.

Historical Atlas of Central Europe Paul Robert Magocsi, 2018-11-12 Central Europe remains a region of ongoing change and continuing significance in the contemporary world. This third, fully revised edition of the Historical Atlas of Central Europe takes into consideration recent changes in the region. The 120 full-colour maps, each accompanied by an explanatory text, provide a concise visual survey of political, economic, demographic, cultural, and religious developments from the fall of the Roman Empire in the early fifth century to the present. No less than 19 countries are the subject of this atlas. In terms of today's borders, those countries include Lithuania, Poland, and Belarus in the north; the Czech Republic, Austria, Slovenia, Croatia, Hungary, and Slovakia in the Danubian Basin; and Serbia, Bosnia-Herzegovina, Montenegro, Romania, Moldova, Bulgaria, Macedonia, Albania, and Greece in the Balkans. Much attention is also given to areas immediately adjacent to the central European core: historic Prussia, Venetia, western Anatolia, and Ukraine west of the Dnieper River. Embedded in the text are 48 updated administrative and statistical tables. The value of the Historical Atlas of Central Europe as an authoritative reference tool is further enhanced by an extensive bibliography and a gazetteer of place names - in up to 29 language variants - that appear on the maps and in the text. The Historical Atlas of Central Europe is an invaluable resource for scholars, students, journalists, and general readers who wish to have a fuller understanding of this critical area, with its many peoples, languages, and continued political upheaval.

Toward a Global Middle Ages Bryan C. Keene, 2019-09-03 This important and overdue book examines illuminated manuscripts and other book arts of the Global Middle Ages. Illuminated manuscripts and illustrated or decorated books—like today's museums—preserve a rich array of information about how premodern peoples conceived of and perceived the world, its many cultures, and everyone's place in it. Often a Eurocentric field of study, manuscripts are prisms through which we can glimpse the interconnected global history of humanity. *Toward a Global Middle Ages* is the first publication to examine decorated books produced across the globe during the period traditionally known as medieval. Through essays and case studies, the volume's multidisciplinary contributors expand the historiography, chronology, and geography of manuscript studies to embrace a diversity of objects, individuals, narratives, and materials from Africa, Asia, Australasia, and the Americas—an approach that both engages with and contributes to the emerging field of scholarly inquiry known as the Global Middle Ages. Featuring more than 160 color illustrations, this wide-ranging and provocative collection is intended for all who are interested in engaging in a dialogue about how books and other textual objects contributed to world-making

strategies from about 400 to 1600.

Maps and Monsters in Medieval England Asa Simon Mittman, 2013-09-13 This study centers on issues of marginality and monstrosity in medieval England. In the middle ages, geography was viewed as divinely ordered, so Britain's location at the periphery of the inhabitable world caused anxiety among its inhabitants. Far from the world's holy center, the geographic margins were considered monstrous. Medieval geography, for centuries scorned as crude, is now the subject of several careful studies. Monsters have likewise been the subject of recent attention in the growing field of monster studies, though few works situate these creatures firmly in their specific historical contexts. This book sits at the crossroads of these two discourses (geography and monstrosity), treated separately in the established scholarship but inseparable in the minds of medieval authors and artists.

Making the Medieval Relevant Chris Jones, Conor Kostick, Klaus Oschema, 2019-12-02 When scholars discuss the medieval past, the temptation is to become immersed there, to deepen our appreciation of the nuances of the medieval sources through debate about their meaning. But the past informs the present in a myriad of ways and medievalists can, and should, use their research to address the concerns and interests of contemporary society. This volume presents a number of carefully commissioned essays that demonstrate the fertility and originality of recent work in Medieval Studies. Above all, they have been selected for relevance. Most contributors are in the earlier stages of their careers and their approaches clearly reflect how interdisciplinary methodologies applied to Medieval Studies have potential repercussions and value far beyond the boundaries of the Middle Ages. These chapters are powerful demonstrations of the value of medieval research to our own times, both in terms of providing answers to some of the specific questions facing humanity today and in terms of much broader considerations. Taken together, the research presented here also provides readers with confidence in the fact that Medieval Studies cannot be neglected without a great loss to the understanding of what it means to be human.

Medieval East Central Europe in a Comparative Perspective Gerhard Jaritz, Katalin Szende, 2016-05-12 *Medieval East Central Europe in a Comparative Perspective* draws together the new perspectives concerning the relevance of East Central Europe for current historiography by placing the region in various comparative contexts. The chapters compare conditions within East Central Europe, as well as between East Central Europe, the rest of the continent, and beyond. Including 15 original chapters from an interdisciplinary team of contributors, this collection begins by posing the question: What is East Central Europe? with three specialists offering different interpretations and presenting new conclusions. The book is then grouped into five parts which examine political practice, religion, urban experience, and art and literature. The contributors question and explain the reasons for similarities and differences in governance and strategies for handling allies, enemies or subjects in particular ways. They point out themes and structures from town planning to religious orders that did not function according to political boundaries, and for which the inclusion of East Central European territories was systemic. The volume

offers a new interpretation of medieval East Central Europe, beyond its traditional limits in space and time and beyond the established conceptual schemes. It will be essential reading for students and scholars of medieval East Central Europe.

Pen and Parchment Melanie Holcomb, Lisa Bessette, 2009 Discusses the techniques, uses, and aesthetics of medieval drawings; and reproduces work from more than fifty manuscripts produced between the ninth and early fourteenth century.

The Middle Ages Jeffrey L. Singman, 2013 We consider the Middle Ages barbaric, yet the period furnished some of our most enduring icons, including King Arthur's Round Table, knights in shining armor, and the idealized noblewoman. In this vivid history of the time, the medieval world comes to life in all its rich daily experience. Find out what people's beds were like, how often they washed, what they wore, what they cooked, how they worked, how they entertained themselves, how they wed, and what life was like in a medieval village, castle, or monastery. Contemporary artworks and documents further illuminate this fascinating historical era.

Marking the Hours Eamon Duffy, 2006-01-01 PT 3: Catholic books in a Protestant world.

Medieval Times, Grades 5 - 8 Frank Edgar, George R. Lee, 2012-01-03 Presents reading selections and assessment strategies covering the history and civilization of the Middle Ages.

Ibn Fadlan and the Land of Darkness Ibn Fadlan, 2012-07-26 In 922 AD, an Arab envoy from Baghdad named Ibn Fadlan encountered a party of Viking traders on the upper reaches of the Volga River. In his subsequent report on his mission he gave a meticulous and astonishingly objective description of Viking customs, dress, table manners, religion and sexual practices, as well as the only eyewitness account ever written of a Viking ship cremation. Between the ninth and fourteenth centuries, Arab travellers such as Ibn Fadlan journeyed widely and frequently into the far north, crossing territories that now include Russia, Uzbekistan and Kazakhstan. Their fascinating accounts describe how the numerous tribes and peoples they encountered traded furs, paid tribute and waged wars. This accessible new translation offers an illuminating insight into the world of the Arab geographers, and the medieval lands of the far north.

The Mapping of Power in Renaissance Italy Mark Rosen, 2015 This well-illustrated study investigates the symbolic dimensions of painted maps as products of ambitious early modern European courts.
