Meditation, Portal to Inner Worlds ,2004

*Just a Second* Steve Jenkins,2011 Explores time and how we think about it in a different way--as a series of events in the natural world, some of them directly observable, others not.

Entity Possession Samuel Sagan,1997-08-01 For centuries Eastern traditions have taken the subject of entity possession quite seriously. Ayurveda, the traditional medicine of India, recognizes bhutas or entities and their influence on mental and physical well-being, as well as the ways they can be evicted from the individual. Now, in a work that is unique in Western literature, Dr. Samuel Sagan examines the problem of these incorporeal beings that attach themselves to human beings as parasites, causing various emotional, mental and physical problems. A landmark study that presents sound analysis and treatment of this phenomenon, Entity Possession demystifies a topic that has long been overdramatized by the folklore surrounding possession and exorcism. Using actual case studies of the hungry ghost phenomenon, Dr. Sagan analyzes their mechanisms and motivations, presenting the facts of entity possession, and including many tips on how to dislodge these parasites from the individuals whose lives are thrown out of balance by their presence.

*The Opening of the Third Eye* Dr. Douglas M. Baker,2014-03-02 The Opening of the Third Eye: The human brain is a priceless computer lying perfectly maintained but almost silent! None of us uses the full potential of this amazing instrument, yet we all possess a secret 'trigger' for activating its mechanism. Called 'the Third Eye' in occult language, this 'trigger' can release a vortex of psychic energy for the extension of awareness in new dimensions, for speeding up or slowing down time as experienced on our planet, and achieving one hundred per cent personality integration. Dr. Baker reveals that the Third Eye derives its power from the pineal, pituitary and carotid glands, allied to 'whirlwinds' of energy known as 'chakras' or force centres. There are seven of these centres in the human body, their physical location being the base of the spine, the solar plexus, the spleen, the heart, the throat, the brow, and the top of the head. Five safe techniques for arousing the Third Eye are provided. They have been practised by the author 'without hazard and with many rewards for over forty years.' In our present condition we can only observe the outer surface of the planet, manifesting in gaseous, liquid and solid form. We

are completely unaware of the subtler states of matter beneath these outward appearances. But the Third Eye reveals all underlying structures. 'This means that one could observe the termites in apparently solid wooden paneling; or, more constructively, man's inner organs could be observed and all traces of disease in them immediately recognised, with consequent enormous benefits to medical progress.'

*The Other Side of Darkness* Gidada Solon, Ruth McCreery, 1972 Keis Gidada Solon was blinded by smallpox at the age of five. His seven older brothers and sisters were all killed by the same epidemic, but he survived and lived as a blind beggar in Ethiopia until the age of twenty when he became a Christian. This book is his story, as dictated to Ruth McCreery and Martha Maxwell Vandevort.

*Amazing Secrets of Psychic Healing* Benjamin O. Bibb, Joseph J. Weed, 1980

**Sometimes a Shining Moment** Eliot Wigginton, 1985 Recounts the triumphant story of the Foxfire program, one of the most successful educational, publishing experiments of our time.

*Beyond the Mask* Kathleen A. Burt, 2010-12-13 Well known and respected internationally for her ground breaking work in Archetypes of the Zodiac, Kathleen Burt now offers us a phenomenal distillation of her life work in: *Beyond the Mask: The Rising Sign - Part II: Libra - Pisces*. *Beyond the Mask Part II* illustrates how midlife urgings bring forth cycles of death and rebirth. Antiquated identities and roles must die, old 'masks' must be peeled away before we can discover a new path in life. Kathleen Burt addresses specifically how the Libra - Pisces rising sign patterns guide us into new life and fresh experiences. With the keen eye of an astrologer examining the biography of creative writers and inspired people, Kathleen Burt brings a depth of understanding to the Rising Sign: Libra - Pisces. This unique volume of wisdom offers decades of scholarly study and practical experience in esoteric astrology, psychology, mythology, and biography and examines the underlying archetypal patterns inherent in our lives.

**Awakening Earth** Duane Elgin, 1993 Just as there are relatively distinct stages that characterize the development of an individual from infancy to early adulthood, so too are there discernible stages in the development of our species as we move toward a planetary-scale civilization. *Awakening Earth* brings together views from science and spirituality, East and West, the practical and the visionary, to present a compelling new picture of human evolution. Based upon twenty years of research, this book explores the human journey from the initial awakening of hunter-gatherers roughly 35,000 years ago, through the agrarian era and Industrial Revolution, and then goes on to describe three additional stages of development essential for realizing our initial maturity as a global species-civilization. A disoriented world civilization faced with dwindling resources, mounting pollution, and exploding population is a recipe for ecological collapse and social anarchy. It is

imperative that the human family begin to make rapid and profound changes in how we live together on the Earth. To accomplish this, we must now ask ourselves fundamental questions: Who are we? What are we doing here? Where are we going as a species? Awakening Earth provides a catalyst for this conversation with its integrative vision and inspiring map of the journey toward a sustainable, compassionate, and creative future. While not predicting a sudden new age of social enlightenment, Awakening Earth does present the promising view that humanity is roughly halfway through seven major transformations in culture and consciousness required to build a planetary civilization that can endure into the deep future.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. **No Sense of Obligation** Matt Young,2001-10-31 Some of the Praise for No Sense of Obligation . . . fascinating analysis of religious belief -- Steve Allen, author, composer, entertainer [A] tour de force of science and religion, reason and faith, denoting in clear and unmistakable language and rhetoric what science really reveals about the cosmos, the world, and ourselves. Michael Shermer, Publisher, Skeptic Magazine; Author, How We Believe: The Search for God in an Age of Science About the Book Rejecting belief without evidence, a scientist searches the scientific, theological, and philosophical literature for a sign from God--and finds him to be an allegory. This remarkable book, written in the laypersons language, leaves no room for unproven ideas and instead seeks hard evidence for the existence of God. The author, a sympathetic critic and observer of religion, finds instead a physical universe that exists reasonlessly. He attributes good and evil to biology, not to God. In place of theism, the author gives us the knowledge that the universe is intelligible and that we are grownups, responsible for ourselves. He finds salvation in the here and now, and no ultimate purpose in life, except as we define it.

In Defense of a Liberal Education Fareed Zakaria,2015-03-30 CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama. While at a General Electric plant in early 2014, Obama remarked, I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree. These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. I get it, writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly, and how to think analytically. He turns our leaders' vocational argument on its head. American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years. Engineering is a great profession, but key value-added skills you

will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the greatest expansion of the idea of a liberal education in human history.

**The Language Instinct** Steven Pinker,2010-12-14 A brilliant, witty, and altogether satisfying book. — New York Times Book Review The classic work on the development of human language by the world’s leading expert on language and the mind In *The Language Instinct*, the world's expert on language and mind lucidly explains everything you always wanted to know about language: how it works, how children learn it, how it changes, how the brain computes it, and how it evolved. With deft use of examples of humor and wordplay, Steven Pinker weaves our vast knowledge of language into a compelling story: language is a human instinct, wired into our brains by evolution. *The Language Instinct* received the William James Book Prize from the American Psychological Association and the Public Interest Award from the Linguistics Society of America. This edition includes an update on advances in the science of language since *The Language Instinct* was first published.
